Worked as a freelancer for 6 month

- web development, project management

Spryox

📅 04/2017

An IT company that works in web/app design development.

- Worked on web template editing
- web Frontend and backend development

PROJECTS

Nokia

Developed module using python and javascript for Odoo platform

Main technologies used in project is Javascript & Python

NETS - NEXI Payment plugins

I have developed and maintained a payment plugin using Nets payment API. I need to follow the standard way of plugin creation for frameworks such as Prestashop, Oxid, Shopware 5-6, Magento, etc.

Which includes providing plugin support to the merchant for that I need to use Zendesk for the ticket system.

ICICI

Developed CMS to handle the Backend of loan processes.

In this project, I handled the UI part and worked on the backend as well.

OPPO

It was an official Android APP of OPPO based on the loan process.

In this project, I created web views for an app which included lead capturing and promotion of offers.

The web views was developed using HTML, CSS & for functionality JavaScript was used, and to share data with App we did Js handshaking.

Dailyhunt

It was a CMS project where the Dailyhunt team could manage their posts and perform all actions like the app.

The whole project was dependent on the Dailyhunt APIs. In this project I worked on UI/UX & API integration.

Shapoorji Pallonji

A real-estate website where users can log in and see the status of their ongoing project and history of payment along with that which include referral process.

In this project I worked on the UI part which also included API integration.

Crowdwisdom360

A website based on polling and gaming where user can play on current active topic.

In this project, I worked on both UI and backend, Along with that we have created APP for that so I have developed API for that APP.

EDUCATION

B.sc (IT)

Mumbai University

📅 2013 - 2016
